Lighted Ear Curettes

McKESSON

The McKesson rechargeable lighted ear curette system is intended to aid in the removal of cerumen and foreign objects from the ear canal. The complete kit includes a rechargeable base for the light source, six each of #1-8 curette tips, two tweezers, and a magnifier that fits on the curette. The disposable, single-use instruments are made from clear polycarbonate plastic. All parts are numbered for easy reordering. Single-use curettes reduce the risk of cross-contamination while also eliminating sterilization costs and hassles.

Features and Benefits

RECHARGE WITH EASE
Easily rechargeable light source eliminates typical replacement costs

SECURE TIP CONNECTION
Threaded curette connection prevents accidental ejection

PRECISION TWEEZING INNOVATION
Innovative tweezer attachment

VERSATILE TIP SELECTION
Eight different curette tips for a range of clinical needs
