Endoscope Sponges

McKesson endoscope sponges support immediate pre-cleaning and manual cleaning of endoscopes and other medical devices directly after procedures. These super-absorbent, contoured polyurethane foam sponges help remove bioburden efficiently while protecting delicate scope surfaces. Available in both presaturated and dry formats, each sponge is individually wrapped for single-use application to support infection-prevention best practices and reduce cross-contamination.

Features and Benefits

PRE-CLEANING EFFECTIVENESS

For immediate precleaning and manual cleaning of endoscopes and other devices after procedures

Presaturated version uses a multi-enzymatic detergent that dissolves a broad range of bioburden on external surfaces and within channels

CROSS-CONTAMINATION CONTROL

Individually wrapped for single use to help reduce cross-contamination

Single-use only; do not reuse

ABSORBENCY & CLEANING PERFORMANCE

Super-absorbent foam removes debris effectively

Contoured round-cylinder design fits scope surfaces to support thorough manual cleaning

MATERIAL SAFETY & SCOPE PROTECTION

Blue polyurethane foam is non-linting and non-latex

Non-corrosive formula in presaturated version is safe for all scopes.

Helps protect delicate scopes during transport

READY-TO-USE OPTIONS

Presaturated sponge comes pre-loaded with the correct amount of concentrated enzymatic detergent for efficiency

Dry sponge provides a detergent-free option while maintaining absorbency and contouring

Not made with natural rubber latex
