(2012 OSHA Hazard Communication Standard (29 CFR 1910.1200))

SAFETY DATA SHEET

SIEMENS

Atellica™ IM Anti-Thyroglobulin (aTG)

SDS # : 10995461

Section 1. Identification

Product identifier : Atellica™ IM Anti-Thyroglobulin (aTG)

Product code : 10995461, 10995462

Product type : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Not applicable.

Manufactured/supplied : Siemens Healthcare Diagnostics Inc.
511 Benedict Avenue
Tarrytown, NY 10591-5097 USA
1-877-229-3711

(800) 424-9300 (CHEMTREC) (24/365)

Section 2. Hazards identification

OSHA/HCS status :

aTG ReadyPack Lite Reagent	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.
aTG ReadyPack Solid Phase	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

Classification of the substance or mixture :

aTG ReadyPack Lite Reagent	Not classified.
aTG ReadyPack Solid Phase	Not classified.

Additional information : Potentially biohazardous material.

Sodium azide may react with lead or copper plumbing to form highly explosive metal azides.

GHS label elements

Signal word :

aTG ReadyPack Lite Reagent	No signal word.
aTG ReadyPack Solid Phase	No signal word.

Hazard statements :

aTG ReadyPack Lite Reagent	No known significant effects or critical hazards.
aTG ReadyPack Solid Phase	No known significant effects or critical hazards.

Precautionary statements

Prevention :

aTG ReadyPack Lite Reagent	Not applicable.
aTG ReadyPack Solid Phase	Not applicable.

Response :

aTG ReadyPack Lite Reagent	Not applicable.
aTG ReadyPack Solid Phase	Not applicable.

Section 2. Hazards identification

Storage	:	aTG ReadyPack Lite Reagent	Not applicable.
		aTG ReadyPack Solid Phase	Not applicable.
Disposal	:	aTG ReadyPack Lite Reagent	Not applicable.
		aTG ReadyPack Solid Phase	Not applicable.
Supplemental label elements	:	aTG ReadyPack Lite Reagent	None known.
		aTG ReadyPack Solid Phase	None known.
Hazards not otherwise classified	:	aTG ReadyPack Lite Reagent	None known.
		aTG ReadyPack Solid Phase	None known.

Section 3. Composition/information on ingredients

Substance/mixture	:	aTG ReadyPack Lite Reagent	Mixture
		aTG ReadyPack Solid Phase	Mixture

Ingredient name	%	CAS number
aTG ReadyPack Lite Reagent		
sodium azide	0.09	26628-22-8
aTG ReadyPack Solid Phase		
sodium azide	0.09	26628-22-8

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	:	aTG ReadyPack Lite Reagent	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
		aTG ReadyPack Solid Phase	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	:	aTG ReadyPack Lite Reagent	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
		aTG ReadyPack Solid Phase	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Section 4. First aid measures

Skin contact	:	aTG ReadyPack Lite Reagent	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
		aTG ReadyPack Solid Phase	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
Ingestion	:	aTG ReadyPack Lite Reagent	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
		aTG ReadyPack Solid Phase	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact	:	aTG ReadyPack Lite Reagent	No known significant effects or critical hazards.
		aTG ReadyPack Solid Phase	No known significant effects or critical hazards.
Inhalation	:	aTG ReadyPack Lite Reagent	No known significant effects or critical hazards.
		aTG ReadyPack Solid Phase	No known significant effects or critical hazards.
Skin contact	:	aTG ReadyPack Lite Reagent	No known significant effects or critical hazards.
		aTG ReadyPack Solid Phase	No known significant effects or critical hazards.
Ingestion	:	aTG ReadyPack Lite Reagent	No known significant effects or critical hazards.
		aTG ReadyPack Solid Phase	No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact	:	aTG ReadyPack Lite Reagent	No specific data.
		aTG ReadyPack Solid Phase	No specific data.
Inhalation	:	aTG ReadyPack Lite Reagent	No specific data.
		aTG ReadyPack Solid Phase	No specific data.
Skin contact	:	aTG ReadyPack Lite Reagent	No specific data.
		aTG ReadyPack Solid Phase	No specific data.
Ingestion	:	aTG ReadyPack Lite Reagent	No specific data.
		aTG ReadyPack Solid Phase	No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician	:	In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	:	No specific treatment.

Section 4. First aid measures

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : In case of fire, use water spray (fog), foam or dry chemical.

Unsuitable extinguishing media : None known.

Specific hazards arising from the chemical : In a fire or if heated, a pressure increase will occur and the container may burst.

Hazardous thermal decomposition products : Decomposition products may include the following materials:
carbon dioxide
carbon monoxide
nitrogen oxides
sulfur oxides

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8).

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
aTG ReadyPack Lite Reagent sodium azide	**ACGIH TLV (United States, 3/2015). Notes: as hydrazoic acid vapor** C: 0.11 ppm, (as Hydrazoic acid vapor) Form: as Hydrazoic acid vapor **ACGIH TLV (United States, 3/2015).** C: 0.29 mg/m³, (as Sodium azide) Form: as Sodium azide **NIOSH REL (United States, 10/2013). Absorbed through skin. Notes: NAN3** CEIL: 0.3 mg/m³, (NAN3) **NIOSH REL (United States, 10/2013). Absorbed through skin. Notes: as HN3** CEIL: 0.1 ppm, (as HN3) **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin. Notes: as HN3** CEIL: 0.1 ppm, (as HN3) **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin. Notes: as NaN3** CEIL: 0.3 mg/m³, (as NaN3)
aTG ReadyPack Solid Phase sodium azide	**ACGIH TLV (United States, 3/2015). Notes: as hydrazoic acid vapor** C: 0.11 ppm, (as Hydrazoic acid vapor) Form: as Hydrazoic acid vapor **ACGIH TLV (United States, 3/2015).** C: 0.29 mg/m³, (as Sodium azide) Form: as Sodium azide **NIOSH REL (United States, 10/2013). Absorbed through skin. Notes: NAN3** CEIL: 0.3 mg/m³, (NAN3) **NIOSH REL (United States, 10/2013). Absorbed through skin. Notes: as HN3** CEIL: 0.1 ppm, (as HN3) **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin. Notes: as HN3** CEIL: 0.1 ppm, (as HN3) **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin. Notes: as NaN3** CEIL: 0.3 mg/m³, (as NaN3)

Section 8. Exposure controls/personal protection

Appropriate engineering controls : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Physical state	aTG ReadyPack Lite Reagent	Liquid.
	aTG ReadyPack Solid Phase	Liquid.
Color	aTG ReadyPack Lite Reagent	Colorless.
	aTG ReadyPack Solid Phase	Colorless to light yellow.
Odor	aTG ReadyPack Lite Reagent	Odorless.
	aTG ReadyPack Solid Phase	Odorless.
pH	aTG ReadyPack Lite Reagent	7.1
	aTG ReadyPack Solid Phase	7.1
Flash point	aTG ReadyPack Lite Reagent	Not available.
	aTG ReadyPack Solid Phase	Not available.
Flammability (solid, gas)	aTG ReadyPack Lite Reagent	Not relevant/applicable due to nature of the product.
	aTG ReadyPack Solid Phase	Not relevant/applicable due to nature of the product.
Relative density	aTG ReadyPack Lite Reagent	1
	aTG ReadyPack Solid Phase	1
Solubility in water	aTG ReadyPack Lite Reagent	Not relevant/applicable due to nature of the product.
	aTG ReadyPack Solid Phase	Not relevant/applicable due to nature of the product.
Partition coefficient: n-octanol/water	aTG ReadyPack Lite Reagent	Not available.
	aTG ReadyPack Solid Phase	Not available.
Auto-ignition temperature	aTG ReadyPack Lite Reagent	Not available.
	aTG ReadyPack Solid Phase	Not available.

Section 9. Physical and chemical properties

Viscosity : aTG ReadyPack Lite Reagent — Not available.
aTG ReadyPack Solid Phase — Not available.

Aerosol product

Type of aerosol : aTG ReadyPack Lite Reagent — Not applicable.
aTG ReadyPack Solid Phase — Not applicable.

Section 10. Stability and reactivity

Reactivity : aTG ReadyPack Lite Reagent — No specific test data related to reactivity available for this product or its ingredients.
aTG ReadyPack Solid Phase — No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : aTG ReadyPack Lite Reagent — The product is stable.
aTG ReadyPack Solid Phase — The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : No specific data.

Incompatible materials : No specific data.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
aTG ReadyPack Lite Reagent				
sodium azide	LD50 Dermal	Rabbit	20 mg/kg	-
	LD50 Dermal	Rat	50 mg/kg	-
	LD50 Oral	Rat	27 mg/kg	-
aTG ReadyPack Solid Phase				
sodium azide	LD50 Dermal	Rabbit	20 mg/kg	-
	LD50 Dermal	Rat	50 mg/kg	-
	LD50 Oral	Rat	27 mg/kg	-

Conclusion/Summary : aTG ReadyPack Lite Reagent — Not available.

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
aTG ReadyPack Lite Reagent			
sodium azide	Acute EC50 0.348 mg/l Fresh water	Algae - Pseudokirchneriella subcapitata	96 hours
	Acute EC50 4.2 to 6.2 mg/l Fresh water	Daphnia - Daphnia pulex - Larvae	48 hours
	Acute LC50 9000 µg/l Fresh water	Crustaceans - Gammarus lacustris	48 hours
	Acute LC50 0.68 mg/l Fresh water	Fish - Lepomis macrochirus	96 hours
	Chronic NOEC 5600 µg/l Marine water	Algae - Macrocystis pyrifera	96 hours
aTG ReadyPack Solid Phase			
sodium azide	Acute EC50 0.348 mg/l Fresh water	Algae - Pseudokirchneriella subcapitata	96 hours
	Acute EC50 4.2 to 6.2 mg/l Fresh water	Daphnia - Daphnia pulex - Larvae	48 hours

Section 12. Ecological information

	Acute LC50 9000 µg/l Fresh water	Crustaceans - Gammarus lacustris	48 hours
	Acute LC50 0.68 mg/l Fresh water	Fish - Lepomis macrochirus	96 hours
	Chronic NOEC 5600 µg/l Marine water	Algae - Macrocystis pyrifera	96 hours

Conclusion/Summary : aTG ReadyPack Lite Reagent — Not available.
aTG ReadyPack Solid Phase — Not available.

Persistence and degradability

Conclusion/Summary : aTG ReadyPack Lite Reagent — Not available.
aTG ReadyPack Solid Phase — Not available.

Bioaccumulative potential

Not available.

Mobility in soil

Soil/water partition coefficient (K_{OC}) : aTG ReadyPack Lite Reagent — Not available.
aTG ReadyPack Solid Phase — Not available.

Mobility : aTG ReadyPack Lite Reagent — Not available.
aTG ReadyPack Solid Phase — Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Sodium azide may react with lead or copper plumbing to form highly explosive metal azides.
