IMPORTANT INFORMATION

Material Safety Data Sheets for VITROS® Chemistry Products

Dear Customer,

It is our policy to provide Material Safety Data Sheets (MSDS) for any Ortho-Clinical Diagnostics products that are classified as hazardous materials.* According to applicable guidelines, all VITROS® Chemistry Products Slides are articles that have exempt status† and most other VITROS Chemistry Products do not require a MSDS.

VITROS Chemistry Products Slides are manufactured items (articles) that are formed to a specific design during manufacture, and are functionally dependent on their design when used as intended. Under normal conditions of use, VITROS Chemistry Products Slides do not release hazardous chemicals and do not pose a physical hazard or health risk to employees or other end-users.

The VITROS Chemistry Products that are classified as hazardous preparations are listed on the following page. The Material Safety Data Sheets for these products are available on the VITROS Chemistry Products Instructions for Use CD and on our website at http://www.orthoclinical.com/. All other VITROS Chemistry Products do not require a MSDS. Specific warnings or precautions, where appropriate, appear in the package insert, instructions for use, or on the package labeling of the product.

For general information regarding laboratory safety and material handling, please refer to a safety manual such as the NCCLS Guideline entitled Clinical Laboratory Safety; Approved Guideline; 1996 (GP17-A)

We recommend that you file this letter with your MSDS records for documentation purposes. Thank you for your continued support of VITROS Chemistry Products.

Sincerely,

Robert DeLuca
Manager
Worldwide Occupational Toxicology
Worldwide Safety & Industrial Hygiene
Johnson & Johnson

Philip M. Schuler
Director
Worldwide Environmental Services
Ortho-Clinical Diagnostics, Inc.

*As defined by OSHA, 29 CFR 1910.1200, Department of Transportation regulations 49 CR 172.604, the EU Directive (99/45/EEC) on Classification, Packaging and Labeling of Dangerous Preparations and other applicable regulations such as WHMIS in Canada.

†As defined in the U.S. OSHA Hazard Communication Standard (29CFR 1910.1200) and the EU Directive (99/45/EEC) on Classification, Packaging, and Labeling of Dangerous Preparations.
